

Mind Connect Product Requirements Document

Product Name	Mind Connect
Target Audience	<ul style="list-style-type: none">○ Young Nigerians (18-35) dealing with issues like loneliness, work-related stress, relationship challenges, and a sense of worth.○ Individuals who may feel isolated, unsure about how to express their mental health struggles, and are seeking support to manage emotional difficulties.○ Mental health professionals (Counseling and Clinical Psychologists) who need a digital solution to manage client interactions, scheduling, reminders, billing, and progress tracking.○ Caregivers and parents of individuals (especially children) with mental health challenges, seeking therapy or mental health support.
Problem Statement	Young Nigerians are increasingly struggling with mental health issues such as loneliness, anxiety, and work-related stress, but they often lack access to easily accessible, affordable, and stigma-free professional support. Additionally, mental health professionals face challenges in organizing their practice, managing client schedules, and maintaining meaningful relationships with clients through digital channels.
Solution	MindConnect provides an integrated teletherapy platform that offers young Nigerians access to qualified mental health professionals for counseling and therapy, focusing on loneliness, anxiety, stress, and interpersonal relationship challenges. It simplifies the process of scheduling therapy sessions, maintaining progress, and handling payments for both therapists and clients. The platform also helps destigmatize mental health through educational content such as podcasts and webinars..

:

Key Features

Therapy Scheduling & Reminders:	For Clients: Easily book sessions with therapists, receive appointment reminders via SMS/email, and cancel or reschedule sessions with ease. For Therapists: Manage appointments, set reminders, and deal with cancellations in an organized way.
Secure Video and Chat Sessions	One-on-one Teletherapy via secure, encrypted video or chat-based sessions. Privacy and confidentiality at the core of the platform's communication
Intake Forms & Progress Tracking	Therapists can send digital intake forms before the first session, with easy-to-fill assessment forms Progress tracking tools allow therapists to keep session notes and track the client's journey over time
Billing and Invoicing	Integrated payment system for clients to pay for their sessions. Automatic invoices and reminders for payments, ensuring streamlined financial transactions for therapists
Therapist Assistant Features	Automated assistant to help therapists with reminders, billing, and session management. Session Notes: Ability for therapists to keep secure notes for each client and easily refer to them during future sessions
Mental Health Education Content	Webinars and Podcasts: A dual track of content focusing on destigmatizing mental health through lived experiences and brief educational insights from mental health professionals. Resources on coping with issues like loneliness, stress, and interpersonal relationships
Therapist Matching Algorithm	Allow clients to either select from a list of psychologists or be automatically matched based on their expressed needs and preferences (e.g., work-related stress, anxiety, etc.)
Mobile-First Design	Optimized for mobile users with a streamlined experience that encourages ease of access to therapists and educational resources

Marketing Opportunity

Literature shows that 1 in 4 Nigerians are dealing with Mental Health Challenges. MindConnect seeks to improve mental health literacy and provide a platform for easy access to mental health care in Nigeria. MindConnect differentiates itself from competitors through a **holistic approach** to mental health care, including comprehensive management tools, culturally relevant education, indigenous language support, and advanced automation. These features create a compelling marketing narrative that appeals not only to mental health professionals seeking efficiency but also to clients who need **accessible, relatable, and stigma-free** mental health services in Nigeria.

Detailed Product Description

Target Audience	General Public, Corporate	General Public, Women	Women, Youth	Youth, Mental Health Awareness	General Public	Youth, Young Professionals

Competitive Insights:

1. Strengths of Competitors:

- Most platforms offer **therapy scheduling and secure video sessions**, which are essential.
- She Writes Woman** and **mytherapist.ng** are more comprehensive with features like **progress tracking** and **assessment forms**.
- MANI** focuses more on **awareness and advocacy**, with limited therapy features.

2. MindConnect Product's Unique Edge:

- Automated assistants**, providing therapists with tools for reminders, session management, and billing automation, are a significant differentiator.
- Comprehensive Feature Set**: Includes intake forms, progress tracking, and assessment forms, ensuring a holistic therapy management system.
- Education content** is a key focus across the platforms, but your product could differentiate further by emphasizing **mental health education** tailored to the specific challenges faced by young Nigerians (e.g., loneliness, work stress).
- Low Cost Therapy option for students: USP: A tiered pricing model** where students can access therapy at a **reduced rate**. This could be achieved through **subsidized plans**
- Why it works**: Cost is often a barrier to therapy, especially for younger people or those with financial difficulties. By offering **affordable solutions**, MindConnect would attract a large pool of users who might not otherwise seek professional help
- *Indigenous Language Support**: **MindConnect** stands out by offering teletherapy services in major Nigerian indigenous languages such as Hausa, Igbo, Yoruba, and Ibibio. This feature addresses

linguistic diversity, making mental health services more accessible and culturally relevant to a broader audience.

Competitive Advantage of Indigenous Language Support:

- **Accessibility:** Breaking language barriers allows non-English speaking Nigerians to access mental health services more comfortably and effectively.
- **Cultural Relevance:** Providing services in native languages respects and acknowledges cultural nuances, fostering a more trusting and relatable therapeutic environment.
- **Market Penetration:** With Nigeria's rich linguistic diversity, offering services in multiple indigenous languages can significantly expand your user base compared to competitors who only offer services in English.
- **Stigma Reduction:** Local language support can help in destigmatizing mental health by making discussions more relatable and less intimidating for individuals who may feel uncomfortable expressing themselves in English.

Implementation Considerations for Indigenous Language Support:

- **Qualified Multilingual Therapists:** Ensure that therapists are proficient in the supported indigenous languages to maintain the quality of therapy.
- **Localized Content:** Develop mental health education content (webinars, podcasts) in indigenous languages to resonate better with the target audience.
- **User Interface:** Design the platform to seamlessly switch between languages, ensuring ease of use for clients from different linguistic backgrounds.

Product Vision

MindConnect aims to be the leading virtual office solution for mental health professionals and the go-to platform for clients seeking therapy. We empower therapists to seamlessly launch online practices while guiding clients to understand their mental health needs and access affordable, effective therapy.

Functional And Non Functional Requirements

Functional Requirements

User Management.	<ul style="list-style-type: none">● User Registration and Login:<ul style="list-style-type: none">○ Users (clients and therapists) must be able to create accounts using email, phone numbers, or third-party authentication (e.g., Google, Facebook).● Profile Management:<ul style="list-style-type: none">○ Both clients and therapists must be able to create, edit, and update their profiles, including personal details, bios, and professional qualifications for therapists.● User Roles:<ul style="list-style-type: none">○ The system must distinguish between therapist and client accounts with different permissions and access controls.
Therapist Office Setup	<ul style="list-style-type: none">● Virtual Office Creation:<ul style="list-style-type: none">○ Therapists should be able to easily create virtual offices, defining their specialties, availability, pricing, and booking methods.● Therapist Verification:<ul style="list-style-type: none">○ Automated and manual verification of therapist credentials (licenses, certifications) to ensure professional standards.● Practice Management Tools:<ul style="list-style-type: none">○ Therapists should be able to manage appointments, client notes, billing, and session history.
Therapy Session Management	<ul style="list-style-type: none">● Therapy Scheduling:<ul style="list-style-type: none">○ Clients and therapists must be able to book, reschedule, or cancel therapy appointments within the platform.● Session Reminders:<ul style="list-style-type: none">○ Automated notifications and reminders for upcoming therapy sessions, sent via email, SMS, or in-app notifications.● Session History:<ul style="list-style-type: none">○ Both therapists should have access to past session summaries and notes (therapist-only for sensitive data).

Therapy Sessions	<ul style="list-style-type: none"> ● Video and Audio Therapy: <ul style="list-style-type: none"> ○ Secure, end-to-end encrypted video and audio call functionality for virtual therapy sessions. ● Text-Based Therapy: <ul style="list-style-type: none"> ○ A secure chat interface for text-based therapy sessions. ● Session Timer: <ul style="list-style-type: none"> ○ Integrated time tracking during video and chat sessions to assist with time management. ● Multilingual Support: <ul style="list-style-type: none"> ○ Enable therapy sessions in major Nigerian indigenous languages (e.g., Hausa, Igbo, Yoruba, Ibibio) for both video and text.
Payment and Billing	<ul style="list-style-type: none"> ● Payment Gateway Integration: <ul style="list-style-type: none"> ○ Support for multiple payment methods including bank transfers, credit/debit cards, and mobile payments (e.g., Flutterwave). ● Automated Invoicing: <ul style="list-style-type: none"> ○ Automatically generate and send invoices to clients after each session. ● Subscription and Pay-Per-Use Models: <ul style="list-style-type: none"> ○ Implement a flexible pricing structure that allows for subscription-based payments or one-off payments for individual sessions. ● Discounts for Students & Low-Income Users: <ul style="list-style-type: none"> ○ implement a tiered pricing model allowing verified students and low-income individuals to access discounted rates.
Intake Forms & Progress Tracking	<ul style="list-style-type: none"> ● Intake Forms: <ul style="list-style-type: none"> ○ Provide therapists with customizable digital intake forms to gather initial client information. ● Progress Tracking: <ul style="list-style-type: none"> ○ Tools for therapists to track clients' mental health progress over time, with regular updates and assessments. ● Client Access: <ul style="list-style-type: none"> ○ Clients can view their progress and feedback provided by their therapists.
Mental Health Education	<ul style="list-style-type: none"> ● Content Library: <ul style="list-style-type: none"> ○ Provide clients with a library of mental health resources, including articles, webinars, and podcasts. ● Topic Personalization: <ul style="list-style-type: none"> ○ Content recommendations based on users' personal needs and issues, such as work stress, loneliness, or relationship challenges.
Mobile-First Design	<ul style="list-style-type: none"> ● Responsive Design: <ul style="list-style-type: none"> ○ The platform should be optimized for mobile use, allowing users to access therapy services via smartphones. ● Mobile App:

- Develop mobile applications for iOS and Android to ensure smooth user experience for booking, managing sessions, and accessing content.

Non Functional Requirements

Performance and Scalability	The platform should ensure fast response times (<2 seconds for most interactions) and be scalable to support up to 100,000 users and 1,000 concurrent sessions, ensuring smooth usage during peak times.
Availability	Ensure 99.9% uptime, providing reliable access to both therapists and clients. Planned maintenance should be scheduled during off-peak hours with advance notification.
Security	All data must be encrypted (AES-256 for data at rest, TLS 1.2+ for data in transit). Implement role-based access control (RBAC) and multi-factor authentication (MFA) for therapists and admins to protect sensitive mental health data.
Usability	The platform must be intuitive and user-friendly, offering clear navigation and an easy onboarding process for both clients and therapists. The user experience must be optimized for mobile and web platforms.
Data Integrity	Ensure automated daily backups of critical data (e.g., client profiles, session notes) and fast recovery processes, guaranteeing data consistency and availability.
Compliance	The platform must comply with Nigeria Data Protection Regulation (NDPR) and international standards like HIPAA to ensure user privacy and legal adherence when handling mental health records

Features Specification Table for MindConnect, Outlining key features, their descriptions, and target users

Feature	Description	Target User
User Registration & Profile	Users can create accounts using email or third-party authentication. Profiles include personal and professional details.	Clients & Therapists
Therapist Office Setup	Therapists can create virtual offices, define specialties, set availability, and establish pricing models.	Therapists
Therapy Scheduling	Clients and therapists can book, reschedule, or cancel therapy sessions. Automated reminders are sent.	Clients & Therapists
Secure Video & Chat Sessions	Provide encrypted video and text-based therapy sessions for client-therapist interactions.	Clients & Therapists
Payment Gateway Integration	Supports multiple payment methods (bank transfers, credit cards, mobile payments) for session payments.	Clients
Intake Forms & Progress Tracking	Customizable digital intake forms for therapists; clients can track their progress and feedback.	Therapists & Clients
Therapist Matching Algorithm	Recommends therapists to clients based on needs, preferences, and specialties.	Clients

Mobile-First Design	Optimized user experience on mobile devices, with responsive web design and dedicated mobile apps.	Clients & Therapists

Simplified Architectural Plan For The MindConnect System

Component	Description	Technologies
User Interface (UI)	Web and mobile applications for clients and therapists to access the platform.	React.js, Flutter, HTML/CSS
API Layer	RESTful API to handle requests between the front-end and back-end systems.	Node.js, Express
Application Server	Hosts the business logic, manages session handling, and communication with the database.	Python (Django/Flask), Node.js
Database	Stores user profiles, session records, therapist information, and progress tracking data.	PostgreSQL, MySQL
Video/Chat Service	Provides secure video and chat capabilities for therapy sessions.	WebRTC, Twilio, Zoom API
Authentication Service	Manages user authentication and authorization, including multi-factor authentication (MFA).	OAuth2, JWT (JSON Web Tokens)
Payment Gateway	Handles payment processing for therapy sessions.	Stripe, Paystack
Content Management System	Manages mental health education content and resources.	WordPress, Contentful
Notification Service	Sends reminders and notifications for sessions, updates, and educational content.	Firebase Cloud Messaging, Twilio
Analytics & Monitoring	Tracks user engagement, session metrics, and system performance.	Google Analytics, New Relic, Datadog
Backup and Recovery System	Automates data backups and implements disaster recovery processes.	AWS S3 for storage, custom scripts
Load Balancer	Distributes incoming traffic to multiple servers to ensure availability and performance.	AWS Elastic Load Balancer, Nginx

Acceptance Criteria

Feature	Acceptance Criteria
User Registration & Profile	<ul style="list-style-type: none">- Users can create an account using email or third-party authentication.- Confirmation email is sent upon registration.- Users can edit and save profile details.
Therapist Office Setup	<ul style="list-style-type: none">- Therapists can create and customize their profiles with specialties and availability.- Therapists can set session prices and payment methods.- Secure document upload is available for certifications.
Therapy Scheduling	<ul style="list-style-type: none">- Clients can view available slots and book sessions seamlessly.- Automated reminders are sent 24 hours and 1 hour before sessions.- Clear instructions for rescheduling or canceling appointments.
Secure Video & Chat Sessions	<ul style="list-style-type: none">- Users can initiate sessions without technical issues.- Video quality is consistent across various speeds.- Sessions are encrypted for confidentiality.
Payment Gateway Integration	<ul style="list-style-type: none">- Payments are processed smoothly with multiple options.- Invoices and payment confirmations are received immediately.- Compliance with PCI DSS standards.
Intake Forms & Progress Tracking	<ul style="list-style-type: none">- Customizable intake forms are available for therapists.- Clients can track their therapy progress and goals.- Structured feedback forms for clients post-session.
Therapist Matching Algorithm	<ul style="list-style-type: none">- Clients are matched to therapists based on criteria within seconds.- At least three recommendations are provided.- Clients can view and select their preferred therapist.
Mental Health Education Content	<ul style="list-style-type: none">- Access to a diverse library of articles, videos, and podcasts.- Regularly updated content categorized for easy navigation.- Option to save and bookmark educational resources.
Automated Assistant Features	<ul style="list-style-type: none">- Automated reminders for sessions and follow-ups are sent to therapists.- Billing statements are generated and sent automatically.- Dashboard access for therapists for insights on sessions.

Multi-Language Support	<ul style="list-style-type: none">- Content and user interfaces available in major Nigerian languages.- Users can easily switch languages in their profile settings.- Educational content is also available in the selected language.
Client Engagement Tools	<ul style="list-style-type: none">- Self-assessment tool for clients to evaluate mental health needs is included.- Tailored recommendations based on assessments.- Clearly defined referral programs with incentives.
Analytics & Monitoring	<ul style="list-style-type: none">- Real-time analytics on user engagement and metrics are accessible to admins.- System performance and uptime metrics are tracked and reported.- Users are notified of scheduled maintenance.
Backup and Recovery System	<ul style="list-style-type: none">- Daily automated backups with verification.- Data recovery achievable within 4 hours.- Regular disaster recovery drills conducted.

MindConnect Key Performance Indicators (KPIs) for the First Year (Nigeria)

User Acquisition
<p>Registered Users: 5,000+ registered users by the end of the first year.</p> <p>New Sign-Ups: .20% month-over-month increase in new sign-ups</p>
<p>Cost Per Acquisition (CPA): CPA under ₦500 for clients and ₦5,000 for psychologists.</p>
<p>Monthly Active Users (MAU): 15%-20% of registered users should be active monthly (scheduling sessions, using educational content).</p>
<p>Therapist Signups: 500+ registered mental health professionals (Counseling and Clinical Psychologists).</p>

Engagement
Session Booking Rate: 40% of registered clients should book at least one session within the first year.
Completed Therapy Sessions: 20,000 - 30,000 completed sessions in the first year.
Retention Rate: Achieve a 60%+ retention rate after the first 6 months.
Platform Stickiness (DAU/MAU Ratio): 15%-20% stickiness, reflecting gradual but steady engagement.

MindConnect Business Model Canvas

Component	Details
