Sprint Retro

Happy	SAD	CHEERS	IDEAS
The Authentication Backend API problems from the previous sprint have been successfully resolved.	Speed of Communication of the team could be better especially on the discord channels. Sprint not completed as originally planned after originally planned		Product Backlog items for the next sprint should be refined, worked on with input and questions from the development team before the end of one sprint

Other Activities

Backend API consumption by the homepage and dashboard is the next phase in the project. The backend for this needs to be ready for the next sprint.

Technical Spikes

 Technical Spikes carried out for team to discuss the following topics
- Writing logic (for functions, reusable components)
- Manipulating Data that comes from an API Source and displaying it.
- Sorting, filtering and Pagination
